PROFIL

5th-year student specializing in Information Systems and Web Development at ESI-SBA, passionate about creating innovative web solutions. With a solid foundation in both front-end and back-end technologies, I thrive on developing dynamic, user-friendly applications. My academic journey has equipped me with the skills to tackle complex challenges, and I am eager to apply my knowledge in real-world projects that make a meaningful impact.

PROJECTS

Daresni (Online tutoring and language learning platform)

- Member of the development team for this platform as a backend and frontend developer. This platform was developed using the microservices method.
- Responsible for developing the front end of several services using Next.js, and responsible for developing the backend of the payment service (simulation) using Spring Boot and MongoDB for database management.
